Issuer Rating by Moody's	A3	A3

- Aggregate leverage is healthy at 37.3%⁽¹⁾⁽²⁾
- Robust financial metrics that exceed bank loan covenants by a healthy margin
- A3 credit rating facilitates good access to wider funding options at competitive rates
- Available debt headroom of ~\$4.4 b to reach MAS' aggregate leverage limit of 50.0%

(1) In accordance with Property Funds Appendix, CLAR's proportionate share of its joint ventures' borrowings and deposited property values are included when computing the aggregate leverage. The ratio of total gross borrowings to total net assets is 66.0%.

(2) Excludes the effects of FRS 116.

(3) Total investment properties exclude properties reported as finance lease receivable.

(4) Based on the trailing 12 months EBITDA (excluding effects of any fair value changes of derivatives and investment properties, and foreign exchange translation), divided by the trailing 12 months interest expense and borrowing-related fees. With reference to MAS Circular No. CFC 01/2021, the interest expense on lease liabilities was excluded as it is an accounting classification and does not reflect the serviceability of debt.

(5) Accounts for distributions on perpetual securities.

(6) Net debt includes lease liabilities arising from FRS 116, 50% of perpetual securities, offset by cash and fixed deposits, while annualised EBITDA does not pro-rate for full year EBITDA from new acquisitions.

(7) Based on year-to-date figures.

Well-spread Debt Maturity Profile

- Well-spread debt maturity with the longest debt maturing in FY2032
- Average debt maturity healthy at **3.5 years**
- To date, green financing totaling S\$1.5 b⁽¹⁾ accounts for about 23% of total borrowings

(1) Includes Green Perpetual Securities of S\$300m.

Prudent Interest Rate Risk Management

- ~78% of borrowings are on fixed rates with an average term of 3.4 years
- 50 bps increase in interest rate is expected to have a pro forma impact of S\$7.0 m decline in distribution or 0.17 cents decline in DPU

Change in Interest Rates	Decrease in Distributable Income (\$m)	Change as % of FY2021 Distribution	Pro Forma DPU Impact (cents) ⁽¹⁾
+ 50bps	7.0	-1.1%	-0.17

Market Outlook

Grab Headquarters, Singapore

Market Outlook

Macro Environment

- In its October 2022 report, the International Monetary Fund (IMF) projected global growth to slow from 6.0% in 2021 to 3.2% in 2022 and 2.7% in 2023. This is the weakest growth profile since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic.
- According to the IMF, “global economic activity is experiencing a broad-based and sharper-than-expected slowdown, with inflation higher than seen in several decades. The cost-of-living crisis, tightening financial conditions in most regions, Russia’s invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook”.

Market Outlook

Singapore

- Based on advance GDP estimates by the Ministry of Trade and Industry (MTI) for 3Q 2022, the Singapore economy grew by 4.4% y-o-y easing slightly from the 4.5% growth in 2Q 2022. The manufacturing sector grew by 1.5% y-o-y, slower than the 5.7% growth in the previous quarter, supported by output expansions in the transport engineering, general manufacturing and precision engineering clusters, which outweighed output declines in the electronics and chemical clusters.
- In August 2022, MTI narrowed its GDP growth forecast for 2022 to “3.0% to 4.0%”, from its previous forecast of “3.0% to 5.0%”, after taking into account the performance of the Singapore economy in the first half of 2022, as well as the latest global and domestic economic developments.
- Consumer Price Index (CPI-All Items) rose 7.5% y-o-y in September 2022, reflecting higher inflation for food, accommodation, services and retail & other goods, offset by lower private transport. MAS Core Inflation, which excludes the costs of housing and private road transport, rose 5.3% y-o-y in September 2022, mainly driven by food, services and retail & other goods. MAS expects CPI-All Items inflation to average around 6.0% for 2022, while MAS Core Inflation is projected to around 4.0%.
- In October 2022, the Monetary Authority of Singapore (MAS) further tightened its monetary policy, its fifth tightening move since October 2021, to dampen inflation in the near term and to ensure medium-term price stability. It will re-centre the midpoint of the Singapore dollar nominal effective exchange rate (S\$NEER) policy band up to its prevailing level. There is no change to the slope and width of the policy band.
- CapitaLand Ascendas REIT’s (CLAR) multi-asset portfolio in Singapore, worth S\$10.1 b as at 30 September 2022, serves a wide range of customers from industries such as technology, biomedical sciences, manufacturing and logistics across their entire chain of operations.
- As part of CLAR’s asset rejuvenation plan, several asset enhancement initiatives and redevelopment projects are ongoing to upgrade property specifications, unlock value through repositioning or meet green rating requirements.

Market Outlook

Australia

- The Australian economy rose 0.9% q-o-q in 2Q 2022, following a rise of 0.7% in 1Q 2022. The continued growth was aided by the first full quarter of re-opened domestic and international borders since the pandemic began. IMF projects the Australian economy to grow by 3.8% in 2022.
- In 2Q 2022, All groups CPI rose 6.1% y-o-y and 1.8% q-o-q. The most significant price rises in the quarter were new dwellings, automotive fuel and furniture in all capital cities.
- At its October 2022 meeting, the Reserve Bank of Australia (RBA) raised its cash rate by 25 basis points to 2.6% and the interest rate on Exchange Settlement balances by 25 basis points to 2.5%. The Australian economy continued to grow and national income was boosted by a record level of the terms of trade. RBA believed this increase in interest rates will help achieve a more sustainable balance of demand and supply in the Australian economy that is necessary to bring inflation back down. The Board expects to increase interest rates further over the period ahead.
- MQX4, a new suburban office property in Sydney, is expected to complete in 2Q 2023, which will expand its footprint within the Macquarie Park innovation district. The total value of properties in Australia is expected to grow to S\$2.6 b after the inclusion of MQX4.

Market Outlook

United States (US)

- Based on advance estimates for 3Q 2022, the US economy grew by an annualised rate of 2.6% following two consecutive quarterly contractions of 0.6% in 2Q 2022 and 1.6% in 1Q 2022. The increase in GDP reflected increases in exports, consumer spending, nonresidential fixed investment, federal government spending, and state and local government spending, that were partly offset by decreases in residential fixed investment and private inventory investment.
- IMF estimates the GDP growth for the US to be 1.6% y-o-y for 2022.
- The CPI All Items index increased 8.2% over the last 12 months ended September 2022. The All Items less food and energy index rose 6.6% y-o-y. The energy index rose 19.8%, a smaller increase than the 23.8% recorded for August 2022. The food index increased 11.2% y-o-y.
- In September 2022, the US Fed raised interest rates by another 75 basis points to a target range of 3% to 3.25%, the highest it has been since early 2008. The Fed also indicated it will keep hiking well above the current level in order to return inflation to its 2% objective. It will also continue to reduce its holdings of Treasury securities and agency debt and agency mortgage-backed securities.
- With the completion of the seven logistics properties in Chicago in June 2022, CLAR's diversified US portfolio was worth S\$2.4 b as at 30 September 2022. The US portfolio comprises business spaces and logistics properties, underpinned by a long WALE period of 4.6 years.

Market Outlook

United Kingdom (UK)

- UK's GDP expanded 0.2% q-o-q in 2Q 2022. The level of real GDP is now estimated to be 0.2% below where it was pre-COVID-19 at 4Q 2019. Based on IMF projections, UK GDP forecast for 2022 is 3.6%.
- The Consumer Prices Index (including owner occupiers' housing costs) rose 8.6% in the 12 months to August 2022, down from 8.8% in Jul 2022. The largest upward contributions to the inflation rate came from housing and household services (principally from electricity, gas and other fuels, and owner occupiers' housing costs), transport (principally motor fuels), and food and non-alcoholic beverages.
- In September 2022, the Bank of England's Monetary Policy Committee (MPC) increased the Bank Rate by 0.5% percentage points to 2.25%. The MPC noted that the risks around its projections from both external and domestic factors were exceptionally large, given the very large increase in wholesale gas prices and the consequent impact on real incomes for UK households and on CPI inflation. The labour market remains tight and domestic cost and price pressures remain elevated.
- The GBP and British government bonds recovered on 25 Oct 2022 following the appointment of Rishi Sunak as Britain's prime minister.

Europe

- The outlook of the economies in Western Europe have been affected by Russia's invasion of Ukraine. Headwinds from higher commodity prices and renewed supply chain disruptions have led to slower growth expectations in 2022. The European Commission reduced its 2022 GDP growth expectations for the European Union to 2.7% in 2022, from 4.0% in its earlier forecast.
- In UK/Europe, CLAR's assets under management amounted to S\$1.6 b as at 30 September 2022. The Europe portfolio comprising logistics properties and data centres has a long WALE period of 6.1 years.

Market Outlook

Summary

- The heightened risk environment continues to put pressure on the global outlook. In addition to rising interest rates and inflation, the export bans by the US of certain advanced materials and technologies to China has added to the uncertainty and volatility in the global supply chains. The ongoing Russian-Ukraine war will continue to have some destabilizing effect on global markets. These ongoing issues may have some impact on tenants' businesses as well as on CapitaLand Ascendas REIT's operating costs.
- On a brighter note, we have maintained steady portfolio occupancy rate of 94.5% and positive rental reversion of 5.4% in 3Q FY2022. The Manager's proactive portfolio management and prudent capital management will help to navigate and mitigate the rising utility and interest expenses. In this respect, we have implemented higher service charge for our Singapore leases from October 2022.
- The Manager is confident that CapitaLand Ascendas REIT's diversified and quality portfolio in developed markets should help it ride through this turbulent period.
